Your advantages at a glance

Looking good on every site.

Whether in the office or in public areas: cold drinks vending machines from Sielaff are suited to any location and highly profitable. The Robimat XL guarantees impulse purchases and ensures sustainable customer loyalty and turnover. Its modular concept is equally sustainable: it is manufactured from 99.71 %* recyclable materials.

For these reasons, the Robimat XL should always be your first choice. Offer your customers an increased selection of products that are well displayed behind a large impactful sales window.

Every Robimat XL is well equipped for the perfect presentation of your product range: First-in-First-out mechanism; full size glass front with perfect product illumination; the Sielaff lift system for gentle dispense. There are almost no limits when it comes to the product selection and filling of this vendor.

The product selection in the XL can be tailored to your customers' requirements.

With nine channels per shelf, the Robimat XL has a capacity of up to 72 different products – that's a huge amount sufficient for any site. The 5-shelf configuration gives enough space for up to 405 x 0.5 l PET bottles.

"Made in Germany" means quality.

Sielaff's vending machine solutions are based on an intelligent modular concept and designed to suit individual sites and your own needs. They also provide high reliability coupled with outstanding value for money.

Less is more: energy-efficient and quiet.

The innovative Robimat XL boasts an energy efficiency better than A++ and offers almost silent product delivery.

Today, security is a key factor on many sites.

The Robimat XL High Security model comes with various security features and options which make it the most secure of choices.

Easy to transport and install.

The Robimat XL can be moved with a pump lift truck, with no need for a pallet. It is free-standing with height-adjustable feet – for "plug and play" installation.

Sustainable and environmentally friendly.

Sustainability is a cornerstone of Sielaff's philosophy and just as important to our customers. Whether refrigeration, heating or lighting, Sielaff vending machines are built to be highly energy-efficient. For example, the Robimat XL vending machines exceed A++ energy efficiency. Amongst other things, this is due to LED illumination, excellent insulation and multi-layer glazing.

Being "green" can be profitable too.

The Robimat XL is our top-end model, packed with innovative technology. It is modular and recycling-friendly with 99.71 %* re-usable materials. The optimal cooling is also economically and environmentally friendly with optimum air flow and the optional use of natural CO₂ as an environmentally appropriate refrigerant.

The end result is higher energy efficiency and a particularly low GWP (Global Warming Potential). Technically sustainable & successful solutions are used effectively in all Sielaff vending machines. Because, when we say it's "Made in Germany" for us it means thinking about the environment and creating profit opportunities.

* of the total machine weight

Talent & Technology

General

- Sells glass bottles, PET bottles, cans and cartons
- Takes products from 200 to 910 grams in weight with a diameter up to 72 mm
- Will fit perfectly in your existing vending machine bank
- Personalised design possible for door, side walls and delivery pocket
- Modular structure makes the Robimat XL extremely service-friendly and recyclable

Energy Efficiency

- Energy efficiency rating better than A++
- Insulated glazing to front door with laminated safety glass

Cooling

- Slide-in chiller unit with optional CO₂ coolant
- Bilateral air flow for maximum interior cooling

Product Delivery Pocket

- Made from high quality plastic
- Easy-to-clean. Can be removed with one hand
- Dishwasher-proof

Shelving

- Shelves of 9 facings divided into three drawers for easy filling
- Top shelves are tiltable
- Transparent product retention clips, giving an unrestricted view of the products
- First-in-First-out dispense principle
- Automatic shelf recognition

Product Delivery

- Products delivered quickly and quietly in less than 10 seconds
- Products delivered to the delivery unit with virtually no shaking
- Sensor in the product basket monitors sales process
- Illuminated product delivery at an ergonomic height

Payment Systems

- Easy integration of payment systems

Delivery and Installation

- Transported by forklift, no pallet
- Simple to install and commission

Housing available in pure white (RAL 9010), white aluminium (RAL 9006) and deep black (RAL 9005)

Now available: Robimat XL with stainless steel operator panel.

Amazingly Secure

Security to the highest level.

There are many reasons why Sielaff machines stand for sustainable vending: technical know-how, intelligent innovations, products to suit the marketplace, ease of servicing. Or perhaps simply that there is a machine specification for every situation and location.

Indoor locations sometimes are subject to vandalism and where a rugged design is the prerequisite for successful vending, the Robimat XL High Security is the right choice. This machine offers anti-impact protection, metal keypad, coin insert slide and coin return drum to prevent manipulation, locking lever protection, security frame with side lock (optional) – ideal for schools, railway stations and airports.

At Sielaff however, security does not make servicing difficult. The impact protection on the Robimat XL is quick and easy to open for cleaning.

Standard

- Impact protection
- Locking lever protection
- Metal keypad
- Coin insert slide and coin return drum

Optional

- High security frame and side lock for when the machine is not protected by a housing.
- An additional back panel can be fitted to a machine which is not positioned against a wall: improved security and extra branding opportunity
